nOS

Hybrid React & React Native Developer

As a (remote) **React & React Native** developer at **nOS**, you will be working directly with our development team to integrate features into our open-source cryptocurrency wallet and application platform for mobile (and desktop).

Programming experience:

- Javascript
- Typescript
- React
- React Native
- NodeJS
- Electron
- Webpack
- Expo
- Redux

Other experience:

- Basic understanding of cryptography and blockchain technology.
- Basic understanding of cryptocurrencies smart contracts.

Daily activities:

- Developing and maintaining **crypto-currency wallet software** and SDK for **desktop (Electron / React) and mobile (React Native)**.
- Migrating logic **from desktop client to mobile** client.
- Migrating React components to cross-compatible React Native components.
- Daily briefing of goals and progress.
- Handling and reporting issues, pull requests, and Continuous Integration (CI) on our Github repositories.
- Reviewing code changes and pull requests by team members and open-source contributors.
- Minimum two weekly e-meetings.

Location: Remote

Compensation: Crypto-currencies (BTC, ETH, USDT, or NEO) and NOS at a monthly basis.
